EXPERIENCE

Software Development Engineer

Jan 2025 – Present

Cyces Innovation Labs LLP

Chennai, TN

Realty of America – Real-Estate Back Office | *Django, DRF, PostgreSQL, Redis, Celery, Docker, AWS*

- Engineered a Django/DRF synchronization service that ingests real-estate transactions from SkySlope using bulk-export and per-record detail APIs, with Celery for scheduled background processing
- Designed incremental synchronization with persisted sync runs and cursors to resume failed runs, process only changed records, and operate within third-party API rate limits
- Implemented audit logging, Django admin tooling and filterable REST APIs; deployed containerized API and Celery worker services on AWS behind Nginx with Redis-backed task queues

Hizli – Quick-Commerce Delivery Platform | *Django, Microservices, RabbitMQ, PostgreSQL, React Native*

- Built Django-based microservices for order, dispatch and rider operations, using RabbitMQ for event-driven communication and asynchronous processing across service boundaries
- Implemented rider assignment, live order tracking and asynchronous order-state processing on PostgreSQL, serving the React Native rider and customer apps

Retaspect – Business Operations & Analytics Platform | *Django, React, PostgreSQL, Redis*

- Developed modular REST API layers and PostgreSQL data models for operational and reporting workflows; added Redis caching and query optimization for heavy dashboard queries in the React frontend

GenEHR – Clinical Documentation Platform | *FastAPI, React Native, HuggingFace, NLP*

- Built FastAPI services running HuggingFace NLP pipelines for consultation transcription, clinical entity extraction and automated report generation, synchronized with a React Native doctor app

Program Educator (Part-time)

Jan 2022 – Jan 2025

CSC Computer Education

Chidambaram, TN

- Mentored 30+ students in full-stack development, REST APIs, database modeling and deployment

OPEN SOURCE

Postman MCP – Independent Open-Source Developer Tool | *Python, MCP, Postman API*

[GitHub](#) | [PyPI](#)

- Built and published to PyPI a Model Context Protocol (MCP) server that generates and updates Postman Collection v2.1 requests from API source code (FastAPI, DRF, Flask, Express, NestJS, Spring Boot)
- Designed a deterministic validate → verify → diff → confirm → write pipeline that re-checks file:line citations and grounds request/response fields against source DTOs before any write
- Enforced safe writes via mandatory diff preview and explicit confirmation, merging into live collections while preserving hand-written tests and examples; tested with pytest and GitHub Actions CI

RESEARCH & AWARDS

Best Paper Award – ICA6NT 2026 | *Artificial Intelligence*

Mar 2026

- Co-authored and presented “Review of Artificial Intelligence Techniques in the Design of Printed Antennas”, contributing the AI-techniques review, at the 6th International Conference on Artificial Intelligence, 6G Communications and Network Technologies (ICA6NT 2026); received the Best Paper Award

EDUCATION

Annamalai University

Chidambaram, TN

Bachelor of Engineering in Information Technology

2021 – 2025

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL

Backend: Django, Django REST Framework, FastAPI, Celery, RabbitMQ, REST API Design, Node.js

Architecture: Microservices, Event-Driven Architecture, System Design, Async Processing, Data Synchronization

Databases: PostgreSQL, Redis, MySQL, MongoDB

Frontend: React, React Native

Cloud & DevOps: AWS, Docker, Nginx, Linux, Git, GitHub Actions

Developer Tools: Postman, MCP
